The Building Blocks of a Successful Ergonomics Program:

Use this foundation to build an ergonomics program that is holistic, strategic, and built to last.

ENGAGING STAKEHOLDERS

The team and facilitator driving the program need to be formed from a cross-section of the organization.

HAZARD IDENTIFICATION

Information about existing or potential hazards should be identified and circulated to all stakeholders.

HAZARD PREVENTION

Appropriate ergonomic controls can be implemented to abate identified hazards.

TRAINING AND EDUCATION

Offer training programs and education to all associates affected by ergonomic stressors.

MEDICAL MANAGEMENT

Holistic medical management includes training, support, and education by health care providers, records review, and early intervention.

PROGRAM EVALUATION

A comprehensive and participatory ergonomics program requires ongoing evaluation and assessment in order for long-term success.

Learn how you can incorporate a comprehensive ergonomics program that builds on your organization's success.
