

The Timeline of EARLY INTERVENTION

Early Intervention is a powerful tool that leads to a significant reduction in the number of workplace injuries by intervening before an injury occurs. Explore the timeline below to see how prevention truly is the best medicine.

PRE-INJURY

POST-INJURY

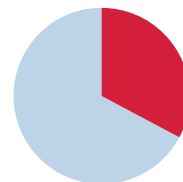

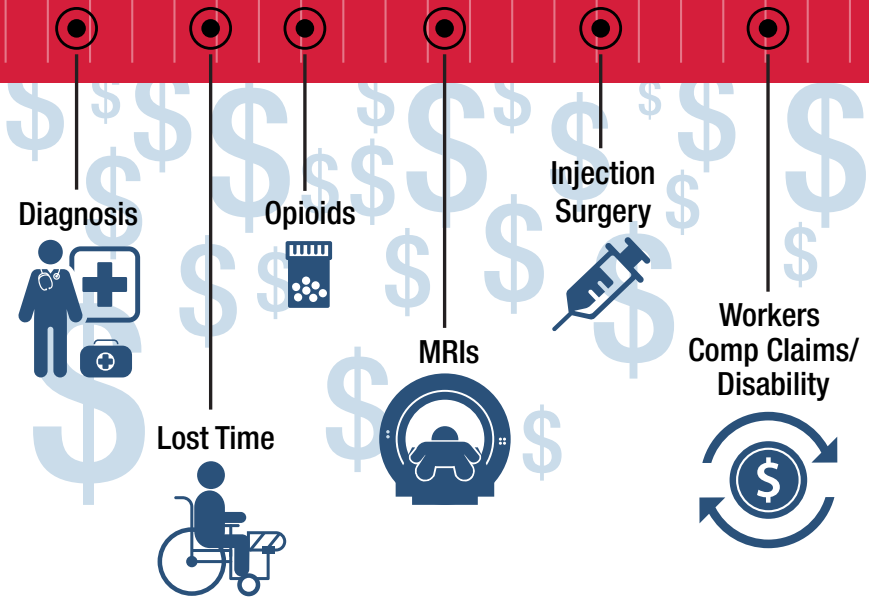

Prevention happens by paying attention to **THREE LEADING INDICATORS** to ensure the injury or accident never occurs in the first place.

Organizations can achieve a **50% REDUCTION** in injuries and their costs.

Injury

MSDs ACCOUNT FOR **33%** of all workers compensation costs

40+ DEATHS occur every day in the U.S. from overdoses involving prescription opioids
